Srujan Gopu

Software Engineer III at Asurion
Nashville, Tennessee

Summary

I am very passionate programmer and I have good knowledge of contemporary technologies being used like Spring, Hibernate etc. I first started coding in Java when I was 18 and since then my passion towards the language has only gone up. Back in India when I was pursuing my undergraduate studies I used to teach others java as a part time job. I extensively read about new developments in java and also I have written a book named "Deal with DS" in my sophomore year of college.
